

How to Assemble: Small speaker, with tape

1. Print parts
2. Tap holes in lower part (purple) with M3 tap, or use a screw to self-tap. The plastic should be soft enough to not need a tap.
3. Secure speaker to underside of top part (green) with the adhesive on the speaker
4. Thread speaker wires through holes in bottom part
5. Secure top part (green) to bottom (purple) with 3X M3 screw
